- Knowledge of how to work with Routers and Switches

About Me

I am a beginner in IT industry, looking for any opportunities to self-develop, work and friends (especially in the IT branch). Actually if you see this, then I want to be hired by you. At the moment it's hard for me to find a real job, because I have no experience so it'll be great if you're looking for beginner/s, send me your suggestions please.

I like and can find almost any information in the Internet. I was shocked by myself, when I've got project in Django and have almost done it without any advanced knowledge.

I am a friendly person, easily making contact with. Team work is a great opportunity in my opinion, so I'll be glad to take part in a team project, if you have one.

I am full of ambitions and dreams, all I need is a job to make my dreams come true ☺… Also I have a specific sense of humor, the nerd one.

I am a nerd. Games, comics, films, serials are very important part of my life, so if you are a nerd too, you can have a great talk with me about some imagined universe.

Rock, Metal, Classic guitar music are my favorite.

My hobbies are: playing guitar, ping-pong, playing modified games after completing the original one.
